COUNTY OF SUFFOLK

STEVEN BELLONE
SUFFOLK COUNTY EXECUTIVE

DEPARTMENT OF HEALTH SERVICES

JAMES L. TOMARKEN, MD, MPH, MBA, MSW
Commissioner

June 6, 2017

Dear Suffolk County Resident,

I am pleased to present this comprehensive directory of substance abuse prevention, education, treatment and recovery services. The directory is the result of efforts of the Suffolk County Drug & Alcohol Subcommittee Prevention Task Group, in collaboration with The Communities of Solution, and the Quality Consortium of Suffolk County.

The services provided by the agencies and organizations vary, so we have provided a glossary of terms and a quick reference page to assist you.

For additional information, you can contact the following agencies:

- **Suffolk County 24/7 Substance Abuse Hotline: (631) 979-1700**
- Suffolk County Division of Community Mental Hygiene Services: (631) 853-8500
<http://www.suffolkcountyny.gov/Departments/HealthServices/MentalHygiene.aspx>
- Prevention Resource Center: (631) 650-0135.
www.liprc.org
- 2-1-1 Long Island (formerly Community Resource Database of LI)
<https://211longisland.communityos.org/cms/>
- New York State HOPEline: 1-877-8-HOPENY
<https://www.oasas.ny.gov/accesshelp/>

If you have revisions or updates to the information found in this directory, please contact the Suffolk County Department of Health, Division of Community Mental Hygiene Services by telephone at (631) 853-8500.

Sincerely,

Ann Marie Csorny

Ann Marie Csorny, LCSW, Director
Suffolk County Division of Community Mental Hygiene Services

DIVISION OF COMMUNITY MENTAL HYGIENE
Ann Marie Csorny, LCSW, Director
North County Complex, Building C928, 725 Veterans Memorial Highway, P.O. Box 6100, Hauppauge, NY 11788
(631) 853-8500 FAX: (631) 853-3117

2017 Directory of Suffolk County Substance Abuse Prevention, Treatment & Recovery Services

GLOSSARY OF TERMS

Adolescent Treatment	The Agency provides specialized services for adolescents.
Ancillary Withdrawal	Ancillary Withdrawal services are the medical management of mild or moderate symptoms of withdrawal within an OASAS certified inpatient/outpatient clinic setting who have protocol for providing ancillary withdrawal services approved by the OASAS Medical Director.
Assessment-	The process of gathering a client's personal and family history and any other data necessary for determining client's treatment needs.
Bilingual Services	Treatments services offered in dual language other than English.
CASAC	The Credentialed Alcoholism and Substance Abuse Counselor Credentials are issued by The New York State Office of Alcohol & Substance Abuse Services and are intended for individuals who provide alcoholism and substance abuse COUNSELING services
Case Management	Case management is the coordination of community services for mental health patients by allocating a professional to be responsible for the assessment of need and implementation of care plans. It is usually most appropriate for people who, as a result of a serious mental illness, have ongoing support needs in areas such as housing, employment, social relationships, and community participation. In particular, service users with a major psychotic disorder are most often suited to receiving services within this model.
Codependent	Codependent is a common condition in people raised in dysfunctional families, and in the partners and children of alcoholics and addicts. It is characterized by living through or for another, attempts to control others, blaming others, a sense of victimization, attempts to "fix" others, and intense anxiety around intimacy.
CPP/CPS	The Credentialed Prevention Professional and Credentialed Prevention Specialists Credentials issued by The New York State Office of Alcohol & Substance Abuse Services which are intended for individuals who provide alcohol and substance abuse PREVENTION services in approved work and community settings.
Criminal Justice Group	Specialized group treatment for those involved in the criminal justice system.
Crisis Intervention	Chemical dependence crisis services manage the treatment of alcohol and/or substance withdrawal, as well as acute disorders associated with alcohol and/or substance use, resulting in a referral to continued care. These services are often provided early in a person's course of recovery and are relatively short in duration, typically in the three to five day range. Crisis services include: medically managed detoxification; medically supervised withdrawal in either an inpatient/residential or outpatient setting; and medically monitored withdrawal.
Day Treatment	Day Treatment a level of care that provides a community based, coordinated set of individualized treatment services to individuals with psychiatric disorders who are not able to function full-time in a normal school, work, and/or home environment and need the additional structured activities of this level of care. While less intensive than hospital based day treatment, this service includes diagnostic, medical, psychiatric, psychosocial, and adjunctive treatment modalities in a structured setting.
Detoxification (Medically Managed)	This service addresses the needs of patients who are acutely ill from alcohol-related and/or substance-related addictions or dependence, including the need for medical management of persons with severe withdrawal or risk of severe withdrawal symptoms, and may include individuals with or at risk of an acute physical or psychiatric co-morbid condition. This level of crisis service is the only one capable of accommodating individuals who are incapacitated and require an involuntary, emergency admission
Domestic Violence	Specialized group treatment for victims of domestic violence

GLOSSARY OF TERMS

DWI	In every state, it is a crime for a driver to operate a vehicle while impaired by the effects of alcohol or drugs. The specific offense may be called driving under the influence (DUI), driving while intoxicated (DWI), operating under the influence (OUI), and even operating a motor vehicle intoxicated (OMVI).
Family Therapy	Substance abuse treatment that involves all members of the nuclear or extended family.
Gambling Treatment	These services assist individuals who are affected by problem and pathological gambling, including family members and/or significant others. These services may be provided in free-standing settings or may be co-located in chemical dependency outpatient clinics or other mental health settings.
Inpatient Rehabilitation	Chemical dependence inpatient rehabilitation services provide intensive management of chemical dependence symptoms and medical management/monitoring of physical or mental complications from chemical dependence to clients who cannot be effectively served as outpatients and who are not in need of medical detoxification or acute care. These services can be provided in a hospital or free-standing facility. Lengths of stay are primarily in the 20-40 day range.
Intensive Outpatient Services	Intensive Outpatient Services are an intermediate level of care for mental health and/or substance abuse care. Individuals are seen as a group 2 to 5 times a week (depending on the structure of the program) for 2 to 3 hours at a time. The clinical work is primarily done in a group setting, with individual sessions scheduled periodically generally outside group hours.
LCSW	Licensed Clinical Social worker: has a graduate academic degree, has had supervised clinical work experience, and has passed a national- or state-certified licensing exam. This advanced professional can receive health-care Private Insurance reimbursements.
LMFT	The Licensed Marriage and Family Therapist has a graduate academic degree, clinical work experience, and has passed state-certified licensing exams. Along with a two- to three-year master's programs with a practicum and internship, LMFTs are required to complete clinical training in individual or family therapy. Some states require completion of 3000 hours of service.
LMHC	The Licensed Mental Health Counselor has advanced training, a graduate academic degree, clinical work experience, and has completed a state-certified licensing examination. Counselors often treat people dealing with problems such as alcoholism, addiction, or eating disorders. Some specialize in marriage, family, or child counseling.
LMSW	Licensed Master Social Worker: A non-clinical social work license, but is permitted to engage in private/independent practice. LMSW-CC is permitted to perform clinical social work but only under the direct consultation of a LCSW/CSW-IP. Also, a LMSW-CC cannot engage in private/independent practice.
MD	The Doctor of Medicine is the most common degree held by physicians and surgeons. Most MDs who work in mental health are psychiatrists. After completing medical school, they receive an additional four years of clinical training in mental health specialties. Psychiatrists treat emotional and mental disorders and are licensed to prescribe medication. These professionals may treat psychiatric disorders with therapy in conjunction with psychotropic medications.
Medically Monitored Withdrawal Service	Medically monitored withdrawal services (crisis centers) provide monitoring of mild withdrawal symptoms and uncomplicated withdrawal. The crisis centers also provide services for those in situational crises at risk for relapse
Medically Supervised Withdrawal Service	Medically supervised withdrawal services provide treatment to individuals with moderate withdrawal symptoms and non-acute physical or psychiatric complications coupled with situational crisis, or who are unable to abstain with an absence of past withdrawal complications. Medically supervised outpatient withdrawal and stabilization services are appropriate for persons with above symptoms and have a stable environment.

GLOSSARY OF TERMS

Medication Assisted Treatment	Medication Assisted Treatment means treatment of chemical dependence abuse and concomitant conditions with medications requiring a prescription or order from an authorized prescribing professional. This may also be referred to as Medication Supported Recovery.
Medication Management	Medication Management is a level of outpatient services where the sole service provided by the qualified physician is the evaluation of the client's need for psychotropic medications, provision of prescription, and ongoing medical monitoring of those medications.
Methadone Services	METHADONE TREATMENT is a medical service designed to manage heroin addiction. Methadone treatment programs (MTPs) administer methadone by prescription, in conjunction with a variety of other rehabilitative assistance, to control the physical problems associated with heroin dependence and to provide the opportunity for patients to make major life-style changes over time. Methadone treatment is delivered primarily on an ambulatory basis, with most programs located in either a community or hospital setting. Some specialized programs deliver services in a residential setting, while a few programs deliver services in a prison setting.
Outpatient Services	Chemical dependence outpatient services assist individuals who suffer from chemical abuse or dependence and their family members and/or significant others. Outpatient services may be delivered at different levels of intensity responsive to the severity of the problems presented by the client. These services may be provided in a free-standing setting, or may be co-located in a variety of other health and human service settings. Sponsorship may be voluntary, proprietary or county operated. There are three chemical dependence outpatient service categories: medically supervised outpatient services, outpatient rehabilitation services; and non-medically supervised outpatient services. The length of stay and the intensity of services as measured by frequency and duration of visits vary from one category of outpatient services to another and intensity will vary during the course of treatment within a specific category. In general, persons are engaged in outpatient treatment up to a year and visits are more frequent earlier in the treatment process becoming less frequent as treatment progresses.
Par-Other Group	A special treatment group for parents who are experiencing the negative effects of living with an adolescent, young adult or adult child, who is using substances and refusing treatment.
Prevention Counseling	Prevention counseling is a short term, problem resolution focused service that concentrates on resolving identified problems and/or assessing and improving the level of youth and family risk and protective factors that are predictive of substance abuse and/or problem gambling. It includes screening and referral for individuals who are abusing substances or may be developing gambling problems and require referral to appropriate treatment services. It does not include treatment for mental illnesses or addictions.
Prevention Education	Prevention Education uses activities and educational presentations to: teach family and youth the consequences of substance use; improve attitudes regarding drug abuse and other problem behavior, and teach drug refusal and other social skills.
Prevention Services	The NYS Office of Alcoholism and Substance Abuse Services defines prevention as a proactive, evidenced-based process utilizing effective programs and strategies to prevent or reduce substance use and problem gambling in individuals, families, and communities.
Psychiatric Evaluation	The assessment of a person's mental, social, psychological functionality.
Relapse Prevention group-	A specialized group focused on teaching a set of skills designed to reduce the likelihood that symptoms will worsen or that a person will return to an unhealthy behavior, such as substance use. Skills include, for example, identifying early warning signs that symptoms may be worsening, or recognizing high risk situations for relapse.

GLOSSARY OF TERMS

Residential Services	Chemical dependence residential services assist individuals who suffer from chemical dependence, who are unable to maintain abstinence or participate in treatment without the structure of a 24-hour/day, 7 day/week residential setting and who are not in need of acute hospital or psychiatric care or chemical dependence inpatient services. There are three levels of intensity of procedures offered by this service: intensive residential treatment and rehabilitation, community residential services, and supportive living services. Length of stay ranges from an average of four months in a community residential service to up to two years in the other residential service categories.
RN	Many Registered Nurses are eligible to be licensed as therapists. They provide a range of primary mental health care services to individuals, families, and groups.
Sliding Scale	Sliding scale fees are variable costs for services based on one's ability to pay. Such fees are thereby reduced for those who have lower incomes or less money to spare after their personal expenses, regardless of income.
Suboxone® Treatment	Suboxone® is a drug primarily used to treat addiction to opiates such as morphine, heroin and codeine. It is administered as a film or tablets that are dissolved under the tongue.
Treatment Planning	Treatment planning refers to the development of a written document that outlines the progression of treatment. The client should always be involved in developing the treatment plan, although this is generally accomplished through informal discussion of the situation. Many therapists present a written copy of the treatment plan to the client.
Vocational Services	Vocational services are a set of services offered to individuals with mental or physical disabilities. These services are designed to enable participants to attain skills, resources, attitudes, and expectations needed to compete in the interview process, get a job, and keep a job. Services offered may also help an individual retrain for employment after an injury or mental disorder has disrupted previous employment.
Women's group	Specialized group treatment for women with substance abuse concerns.
