50TH ANNIVERSARY OF THE SUFFOLK COUNTY SOIL AND WATER CONSERVATION
DISTRICT

—————
HON. TIMOTHY H. BISHOP

of new york

in the house of representatives

Wednesday, September 17, 2014

Mr. BISHOP of New York. Mr. Speaker, I rise today to recognize the 50th Anniversary of the Suffolk County Soil and Water Conservation District. Since 1964, the Suffolk County Soil and Water Conservation District has actively developed and implemented specialized projects and educational programs to improve, protect, and preserve Suffolk County's most treasured natural resources.

Suffolk County's thriving agriculture has been assisted by the conservation efforts of the Suffolk County Soil and Water Conservation District in partnership with the local communities and landowners, the U.S. Department of Agriculture, the Long Island Farm Bureau, the Cornell Cooperative Extension and Research Lab, the New York State Soil and Water Conservation Committee, the New York State Department of Agriculture and Markets, the New York State Department of Environmental Conservation, and the New York Association of Conservation Districts.

As a result of this collaboration, Suffolk County leads the rest of our great state in market value of crop production, including sod, grapes, nursery stock, aquaculture, and specialty crops. The County can also be proud of flourishing agricultural tourism, known for attracting thousands of visitors to wineries, greenhouses, and seasonal pumpkin picking.

Consisting of over 600 farms spanning 35,000 acres, Suffolk County farms form the pillar of the East End economy and contribute millions of dollars to the Long Island and New York state economies, supporting local jobs and igniting economic growth across the region. This success is sustainable with the help of the Suffolk County Soil and Water Conservation District and can help further propel Long Island's continuing economic recovery.

Mr. Speaker, helping local farmers secure federal aid and educating them about building green infrastructure are just some of the many critically important functions of the Suffolk County Soil and Water Conservation District, which remains dedicated to the success of Long Island farmers and small businesses, and why it is an honor to offer my congratulations on the occasion of its fiftieth anniversary.
